1] Functional Requirements (to consider)

Interface

Create (Summarization/ Entities)

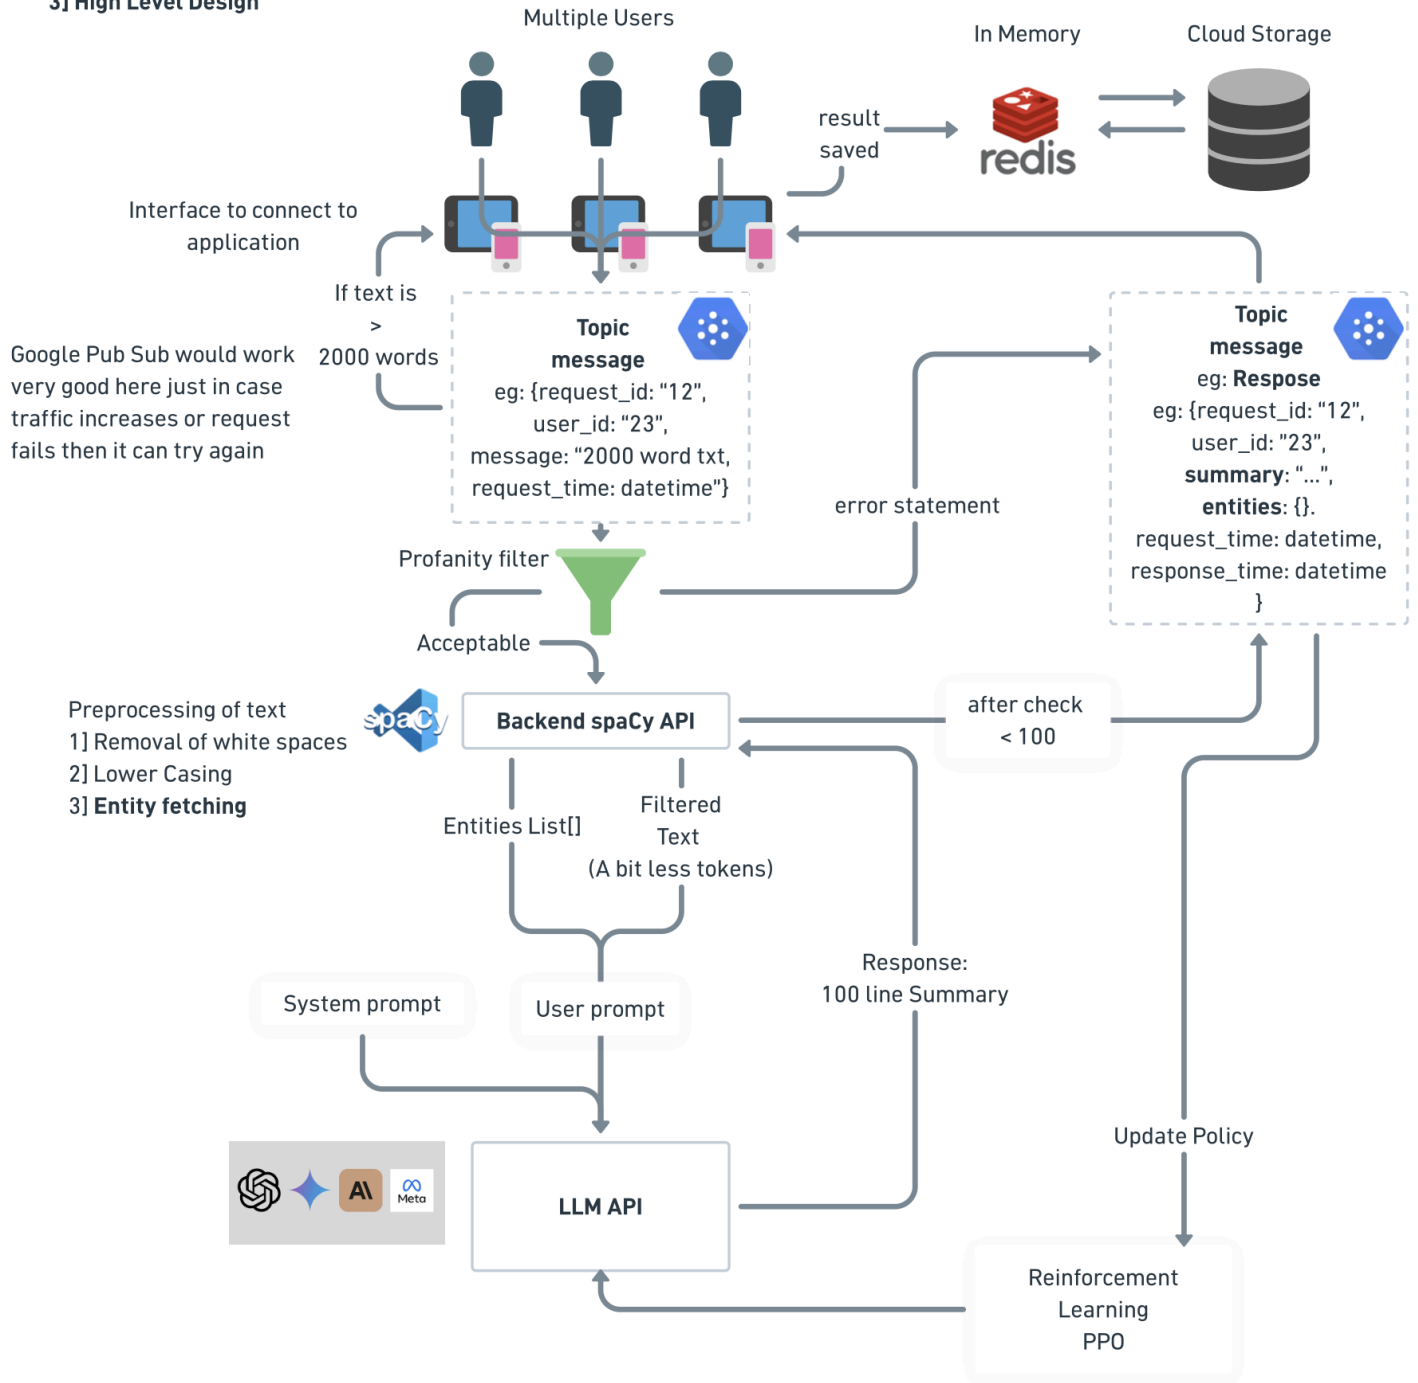

View (Current/ Previous chats)

Delete (Conversation)

2] Non - Functional Requirements (to consider)

- Latency → How long should it take to respond ? (5- 10 sec at most)
- Security → Login System (IAM), Rate Limiter (50 requests per user per day)
- Scalability → Calls : 5 M users per day = 5 avg conversations * 5 M = 25M requests/day
→ Storage: 3KB/chat (prompt + response pair) * 5M * 5 = 75GB storage / day

3] High Level Design

4) Contracts
